

## Groundhog Day Cup Puppet

Materials:

- Copy of Groundhog (See below)
- Craft stick (I've used a large one in my example.)
- Glue
- Styrofoam cup

Directions:

- Cut out groundhog.
- Glue groundhog onto craft stick (Leave 4 inches at the bottom for movement of groundhog)
- Cut out a strip of green construction paper that will cover your cup and then snip one side so it looks like grass.
- Tape the green paper to the outside of the cup.
- Cut a small slit in the bottom of the cup. (Get your parents to help with this. I used scissors.)
- Put the stick through the slit
- Move up and down.

See pictures on the next page.
